40% of all businesses hit by a disaster close because they had no disaster recovery plan. Learn how to establish disaster recovery and business continuity plans to protect your business from all threats.

Why attend this webinar? Have you ever had that uneasy feeling that something bad was about to happen to your company? Have you heard about disasters (natural and man-made) and how they've destroyed entire organizations? Have you seen news stories about businesses that took weeks or months to recover from a disaster?

What you will learn:

A disaster recovery plan (DRP) is a set of policies and procedures that enable the organization to quickly recover its I/T infrastructure in the event of a disaster. The business continuity plan (BCP) addresses the risks facing the company to ensure that it is able to function in the event of a disaster.

How to apply this technology in your business? Assess risk, identify points of weakness, find ways to create redundancy, and engage outside resources to implement disaster recovery and business continuity plans in your organization.

Who should attend? Business owners and middle managers in operations and finance, team members responsible for information technology.

About the Presenters:

Brian Iinuma is the President and co-founder of Strategic Systems Group, a Los Angeles-based I/T consulting firm, experts in enterprise resource planning. His company helps small and mid-sized manufacturing and distribution companies better utilize their ERP systems to improve their business processes and profitability.

Eddie Bader of Company Built started his technology career at the Disneyland Resort working on their SAP. He currently works with many different industries including nonprofits, healthcare providers, and department of defense contractors. Eddie is client-focused and works to develop solution-based IT recommendations that meet a client's needs.

Eric Klauss has over 20 years of experience selling, consulting and recommending business technology solutions, especially ERP & CRM as a customer, consultant, and salesperson in the industry. Today, he provides his sales and marketing expertise to PartnerSource Solutions clients and is a SCORE Mentor to business clients in Southern California.
